DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 29-47, drawn to an antibody that specifically binds human calcium independent cytosolic phospholipase A₂/B enzyme, and compositions containing said enzyme, classified in class 424, subclass 146.1.
 - II. Claims 48-55, drawn to an antibody that specifically binds hamster calcium independent cytosolic phospholipase A₂/B enzyme, and compositions containing said enzyme, classified in class 424, subclass 139.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are different products. The structure, sequence and biochemical properties of human and hamster calcium independent cytosolic phospholipase A₂/B enzyme are different, and as such antibodies that bind such structures, and compositions that make use of said antibodies, must also differ in structure. Therefore, they are patentably distinct.

Art Unit: 1644

3. Because these inventions are distinct for the reasons given above and the literature search required for Group I is divergent from the search required for Group II and Groups I and II have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

The claimed species are the sequences of human calcium independent cytosolic phospholipase A₂/B enzyme that are specifically bound by an antibody. Applicant is required to elect a species from the following list:

- A) SEQ ID NO: 17 (SEQ ID NO: 16),
- B) SEQ ID NO: 19 (SEQ ID NO: 18),
- C) SEQ ID NO: 21 (SEQ ID NO: 20), or
- D) SEQ ID NO: 23 (SEQ ID NO: 22).

These species are distinct because they differ in structure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 29 is generic for example.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 1644

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1644

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Szperka whose telephone number is 571-272-2934. The examiner can normally be reached on M-F 9-5:30.
